

Questions for the Audiologist

1. My child was identified as deaf. What does that mean?
2. What are conductive, sensorineural and mixed hearing statuses ?
3. I would like to see an audiogram and learn more about what it means.
4. I would like to see something that explains my child's hearing levels in a way I can understand.
5. I would like a demonstration or simulation of my child's hearing levels.
6. If I choose hearing technology for my child, what device(s) would you recommend and why?
7. Will my child's hearing levels change over time or is it permanent?
8. Would you recommend genetic testing to see if something could have caused a difference in my child's hearing levels that would also impact their health?
9. Could you refer me to a speech-language pathologist with experience in working with deaf or hard of hearing infants and toddlers?
10. Could you put me in touch with the schools for the deaf/hard of hearing in Luquillo and/or San Juan? If you cannot, can you refer me to other professionals with experience educating deaf/hard of hearing children?
